LIFE SCIENCES

Starting a Revolution Isn't Enough

CRISPR is changing the world—but it can do more.

theatlantic.com

A Bold Effort to Cure HIV—Using Crispr

An experiment tests whether the gene-editing technology can stop the virus from replicating, which would ultimately wipe out the infection.

wired.com

Human genomics vs Clinical genomics

We're now well over 20 years since the first human genome was sequenced, but with few exceptions the massive amount of data that has been generated has not been transformed to routine patient care.

ARTIFICIAL INTELLIGENCE

Of God and Machines

The future of artificial intelligence is neither utopian nor dystopian—it's something much more interesting.

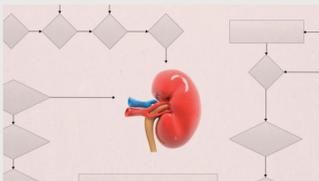

theatlantic.com

Learning on the edge

A new technique enables on-device training of machine-learning models on edge devices like microcontrollers, which have very limited memory. This could allow edge devices to continually learn from new data, eliminating data privacy issues, while enabling user customization.
